SH/317/1989 - Noviembre

COSTA RICA  
CÁLCULO DE POBLACION  
POR PROVINCIA, MUNICIPIO Y DISTRICTO  
AL 1 DE ENERO DE 1989

## PRESENTACION

La Dirección General de Estadística y Censos del Ministerio de Economía, Industria y Comercio tiene el agrado de ofrecer el Cálculo de Población al 1º de Enero de 1989. De esta forma reinicia su publicación, que había sido suspendida desde el año 1984 por razones presupuestarias.

Es importante que los usuarios cuenten con esta información publicada, pues constituye una herramienta más para la planificación de múltiples actividades. Por esta razón, la Dirección General de Estadística y Censos se ha dado a la tarea de buscar recursos permanentes para darle la continuidad requerida.

Para el presente Cálculo de Población se utiliza como base la población censal estimada y corregida por efecto de omisión, según los resultados de la evaluación conjunta realizada por el Centro Latinoamericano de Demografía (CELADE), la Dirección General de Estadística y Censos y el Ministerio de Planificación Nacional y Política Económica y trasladada al 1º de julio de 1984.

El Cálculo de Población que aquí se presenta se obtiene sumando a la población base, o inicial, los nacimientos ocurridos en el intervalo de tiempo en estudio y restándole las defunciones ocurridas en ese mismo período. Esto se conoce como "crecimiento vegetativo" de la población. El supuesto básico subyacente en este cálculo es que se trabaja con una "población cerrada", la cual es aquella población que no tiene crecimiento o disminución por causa de la migración; es decir, el cálculo no incluye los movimientos migratorios nacionales ni internacionales, por lo que se advierte a los usuarios que tengan en cuenta esta situación en el momento de sacar conclusiones.

En este documento se incluyen los distritos creados recientemente por la Comisión de la División Territorial Administrativa, a los que se dio vigencia para efectos de cálculo de población a partir del 1º de enero de 1989.

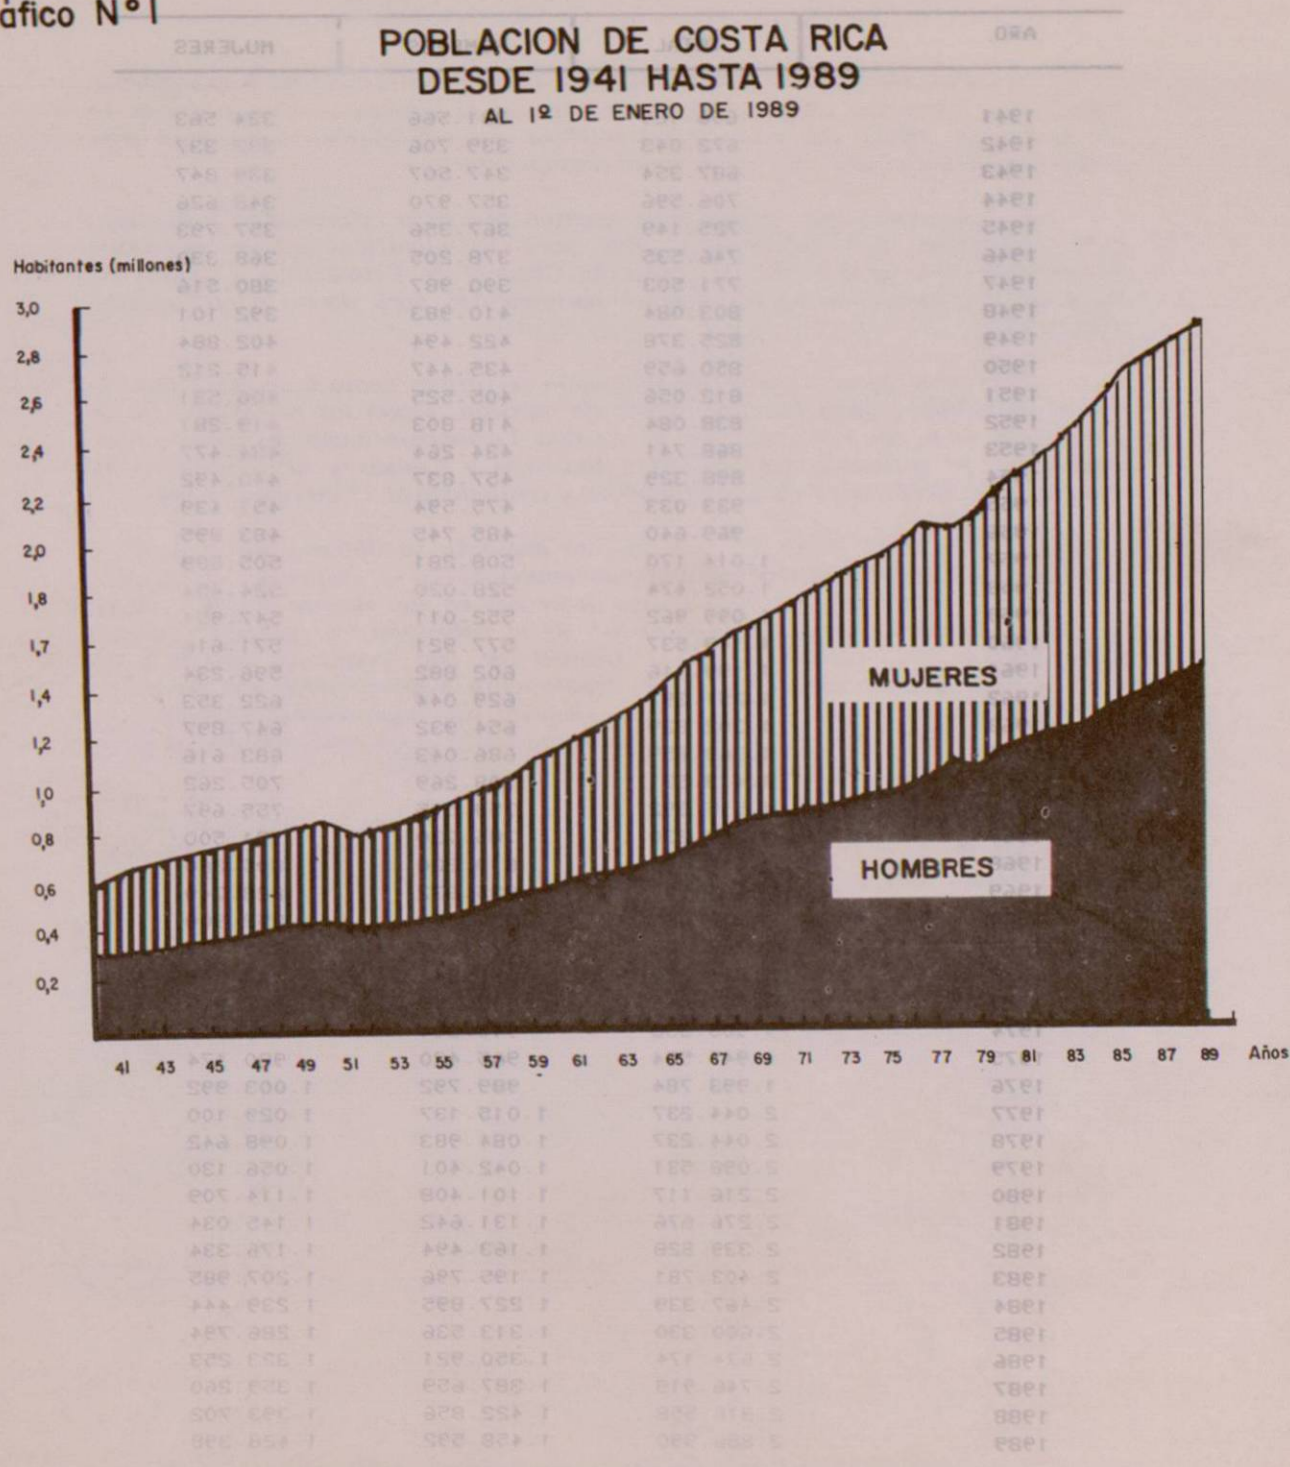

LA DIRECCION
